### Decision Items

- None at this meeting.

### Follow-Up Items

- None at this time.

### Notes

Opening remarks included an introduction and a brief overview of today's topics.

- Charles facilitated a discussion of where the process was at when the group last met and where the process is now, briefly covering how the budget exercises had been adapted and modified to fit the structure of the SHIP and address the immediate needs of the three year testing period.
- Video introduced as a summary that the WG members can point individuals to get a brief overview.

### Roll Call

- Opening remarks included an introduction and a brief overview of today's topics.
- Video introduced as a summary that the WG members can point individuals to get a brief overview.

## **SHIP Deck**

Presentation delivered on the core components of the SHIP. What followed was Q&A.

Q: Does Medicaid have the current funding and vehicles to accomplish this? Does Medicaid need legislative authority?

A: Medicaid has the authority in place through its current tiered payment authority — Medicaid will need to slightly modify the existing structure to accommodate.

Q: Has National Committee on Quality Assurance (NCQA) been accepted as the standard.

A: Yes, the steering committee (SC) will continue to explore those other accreditation bodies as acceptable in lieu of NCQA. After evaluating the difficult level of work needed to step up its own standard, the SC decided that the state should pursue a state only track.

Q: Would the resource coordinator (RC) be able to locate a medical home for the payer that has a member in that catchment area but needs a bit of help locating resources.

A: Yes, absolutely. It is that type of service that the RCs could provide to be a value added and justify their sustainment.

Q: What percent of total spent is \$70 million (the total three-year savings)?

A: Less than 1%.

Q: What was the increase to 85% of the generic from?

A: The 85% represent a reasonable move from the current generic rate.

## **Wrap Up**

Being the last meeting, the workgroup was thanked for all of its effort and encouraged to advocate for the SHIP and to remain available as the SHIP takes form and technical matters need solving.
